

Colorado commercial vendor sample

SNOW REMOVAL & LANDSCAPING / SOURCE-VERIFIED SHORTLIST

Prepared by Koray Nar. Sources retrieved 18-19 September 2026.

Five companies that appear capable of commercial property work, and three I excluded.

What this is, precisely. This is **desk research**: everything below was read on a business registry, a company's own website, or a business listing. **No company was telephoned and no contact form was submitted.** Phone numbers are recorded as *published*, not as *tested*. That distinction matters here more than usual, because a published number can outlive the business behind it - so the first item on the qualification checklist at the end is to call all five.

The registry. Colorado publishes its Secretary of State business entity records as open data. Each company below carries its state entity ID, and any row can be re-checked directly:

https://data.colorado.gov/resource/4ykn-tg5h.json?entityid=ENTITY_ID

What "Good Standing" does and does not mean. It means the entity's filings are current. It does not certify that the business is trading, that anyone answers the phone, or that it carries insurance. Legal standing and trading activity are different measurements, and this sample keeps them separate.

The five

1. CoCal Landscape Services Inc. - trading as CoCal Landscape

Entity ID **19921124021** · Good Standing · formed 28 Dec 1992 · registered agent Jesus Medrano

Address	333 E. 76th Ave, Denver, CO 80229 - matches the registry principal address
Phone	(303) 399-7877 - published, not call-tested
Email	cocalcares@cocal.com, plus a contact form
Service area	Published city list: Wheat Ridge, Westminster, Thornton, Sheridan, Parker, Northglenn, Lyons, Loveland, Longmont, Littleton, Lakewood

Commercial capability. Their snow service is published as a commercial one: *"CoCal Landscape offers comprehensive snow removal and ice management services to ensure your property remains safe, accessible, and fully operational throughout the winter season."* The homepage heading is *"Proudly Serving Commercial Properties Across Colorado"*, and they publish a named client: *"Trusted by Industry Leaders - Amazon and top commercial brands count on us."* They also describe snow equipment and contract structure, which distinguishes a commercial snow operation from a landscaper with a plow.

Treat the named client as a company-published reference, not a verified current contract.

Sources: [registry](#) · [snow / commercial](#) · [contact](#) · [homepage](#)

2. Martinson Snow Removal, Inc. - trading as Martinson Services

Entity ID 19991167985 · Good Standing · formed 8 Sep 1999 · registered agent Andrea Nataf

Address	8640 Welby Road, Thornton, CO 80229. The registry records the same street address under Denver, 80229 - a city-label difference on one address, not two locations
Phone	(303) 424-3708 - published, not call-tested
Email	anataf@martinsonservices.com, plus a form
Service area	Published as Colorado statewide, marketed from Denver metro

Commercial capability. Named property types on their own page: *"Our clients include office parks, retail centers, industrial campuses, HOAs..."* They carry a standing service line called **Year Round Commercial Property Maintenance**, and publish a named testimonial from *Lary Herkle, General Manager of Belmar, and President of Continuum Property Management Company*, describing snow removal and de-icing at Belmar in Lakewood.

A named property-management reference is the most checkable evidence in this sample - it can be called and asked. It remains a company-published testimonial until it is.

One practical note: this server returns HTTP 403 to some automated requests and 200 to an ordinary browser. An automated link check would wrongly record the company as unreachable.

Sources: [registry](#) · [commercial property maintenance](#) · [snow removal](#) · [named testimonial](#) · [contact](#)

3. American Landscape Maintenance Co., Inc. - trading as ALM

Entity ID 19961156649 · Good Standing · formed 4 Dec 1996 · registered agent Shannon Myles

Address	9432 N. Motsenbocker Rd, Suite 200, Parker, CO 80134. Registry gives 9432 Motsenbocker Rd, Bldg 2 - suite-versus-building unresolved, worth confirming
Phone	(720) 710-2960 - published, not call-tested
Email	info@alm-colorado.com - published on the homepage as a mailto: link
Service area	Published under "South Denver": Denver Tech Center, Greenwood Village, Meridian, Cherry Hills, Littleton, Englewood, Centennial, Lone Tree, Highlands Ranch, Castle Pines, Castle Rock, Parker, Aurora, Denver

Commercial capability. Their published navigation is entirely commercial - *Commercial Services* · *Commercial Landscape Management* · *Commercial Landscape Construction* · *Snow Management* - and the snow page reads "24/7 SNOW SERVICES - commercial + retail + multi-family housing". No residential offering appears anywhere on the site.

Note the limit of that observation: an absence of residential navigation shows commercial *focus*. It does not establish that the company declines residential work.

Identity caution - worth reading before anyone else researches this address. A [Google listing named American Design & Landscape](#) displays the **same street address**, 9432 N Motsenbocker Rd, Parker, CO 80134 (read 19 Sep 2026, 18:05 TRT). The listing uses a different business name, website (americandl.com) and phone ((303) 841-2820) from ALM's; **its relationship to ALM is unestablished**. Because of that, none of its reviews are attributed to ALM, and no rating is quoted for ALM anywhere in this document. A shared street address does not establish common ownership, and it does not by itself prove two separate legal entities either. Flagging it because attributing that listing's reviews to ALM is the obvious mistake at this address.

Sources: [registry](#) · [snow management](#) · [contact / service area](#) · [homepage](#)

4. Greenways Landscape Services, LLC - trading as Greenways Landscape & Services

Entity ID **19981063288** · Good Standing · formed 6 Apr 1998 · registered agent David Depew

Address	21151 East 31st Circle, Aurora, CO 80011 - registry and website agree
Phone	(303) 576-6368 - published, not call-tested
Email	Info@GreenwaysLS.com, Dave@GreenwaysLS.com - published on the site, not tested
Service area	"We serve clients throughout the I-70 / DIA corridor in Aurora and have expanded further east of E-470 into Watkins and Bennett."

Date discrepancy, recorded not explained. The website states "*founded in 2001 by Dave DePew*"; the state entity was formed **1998**. These may describe different events - an operating start versus an entity filing - but nothing I read connects them, so both are recorded as found.

Commercial capability. From their own About section: "*Developers, builders, metro districts, cities, and businesses trust us to meet deadlines... providing commercial landscape installation, enhancements, and maintenance for business parks.*" They publish a Winter and Snow Management section.

Municipal and metro-district marketing is a useful signal, but it is marketing - it does not evidence insurance or bonding. Ask for both.

5. SaBell's Snow Plowing & Landscape Service, Inc.

Entity ID **19871767484** · Good Standing · formed 31 Dec 1987 · registered agent Nicholas Sabell

Address	5555 W Ohio Ave, Lakewood, CO 80226 - matches the registry exactly
Phone	(303) 936-9455 - published, not call-tested
Email	none published - phone or on-site quote form only
Service area	Published list: Arvada, Aurora, Boulder, Centennial, Denver, Edgewater, Englewood, Glendale, Golden, Highlands Ranch, Lakewood, Littleton, Lone Tree, Northglenn

Commercial capability. Publishes a **dedicated client-list page**, headed "*Serving Local Colorado Businesses Since 1973*", with the line "*Below is a list of some of our local Denver clients that we have happily provided snow and ice removal services for over the past 40 years.*" The page names each client with its street address - among them Acosta Foodservice (2534 18th St), Aggreko (3737 Troy St) and Buckhorn Exchange (1000 Osage St), all Denver.

Two limits worth stating: the page describes relationships over four decades, so some may be historical rather than current; and they publish service to "*residential and commercial clients*", so this is a mixed book. Whether a mixed book affects storm-day capacity is a question to ask them, not something this research establishes either way.

Sources: [registry](#) · [client list](#) · [contact / coverage](#)

The three I excluded

Each failed a different test. In every case the exclusion is from *this sample* - none of it establishes that a business is inactive.

D J Snowplowing & Maintenance, Inc. - no snow-service evidence found

[Entity ID 19911030660](#) · Good Standing · formed 30 Apr 1991 · Denver

I did not identify a company-controlled website for it in this search, and no independently verified evidence of current snow or landscape service. That second point is the basis for excluding it from this desk-research shortlist - not the contact position, which is no different from the five above, where every number is published and untested.

What the listing displays. A [Google listing for D J's Snowplowing & Maintenance Inc](#) shows the category "**Excavating contractor**", at 2555 CO-224, Denver, CO 80229, with a published listing phone of (303) 289-7000 - untested, like every other number in this document (read 19 Sep 2026, 18:02 TRT; the listing shows "Claim this business" and no website). That address matches the registry record, which gives 2555 E Highway 224, Denver 80229 - CO-224 is Highway 224. Name, street, city and ZIP all agree, which makes this a **likely** match to the registry entity; I found no unique identifier tying the listing to it conclusively, so it is recorded as likely rather than certain.

Two limits on what that category means. A Google category describes how a business is filed, not an exhaustive inventory of what it does, so it does **not** establish that this company never plows. And the exclusion rests on the absence of independently verified current service evidence, as above - not on the category itself.

Why it is instructive: the legal name contains "Snowplowing" while the listing category says excavating. Good Standing tells you a filing is current; it tells you nothing about what a company does today.

Aspen Leaf Landscape Maintenance, Inc. - current direct contact could not be established

[Entity ID 19871556267](#) · Good Standing · formed 6 Feb 1984 · Colorado Springs

Excluded because **a current, dependable direct contact could not be established** - not because the business is closed. I am not asserting closure, and nothing below should be read as asserting it.

- The entity is in Good Standing, registered at 1504 N Wahsatch Ave, Colorado Springs 80907.
- A [BBB listing](#) records the company name at **777 Conrad St**, a second Colorado Springs address.
- The company name also appears at that address in a [2024 Cherokee Metropolitan District tester list](#) - that is a listing in a 2024 directory, which is not the same as evidence of operating today.

So the company is traceable in public records and appears in a 2024 district directory. What I could not establish is a working way to reach it now. For a bench you intend to call in a storm, that is disqualifying on its own, and it needs no stronger claim.

Magnum Snow Removal, Inc. - no independent contact surface found

Entity ID 20041276395 · Good Standing · formed 6 Aug 2004 · Broomfield

I did not locate a company-controlled operating or contact surface under the Magnum name in this search - no website of its own, no listing it controls. The state registry does publish under that name, which is how the record below was found; what is missing is anything the company itself publishes. On that basis it is excluded from this desk-research shortlist.

An address overlap worth checking before writing it off. The registry records Magnum at **270 Interlocken Blvd, Broomfield, CO 80021**, with registered agent **Victor Vargas** ([registry](#)). The same street address is published by *Vargas Property Services* on its own site ([vargasvps.com](#) and its [contact page](#), read 19 Sep 2026). **I have not established an operating or trade-name relationship between the two**, and a published address does not prove current physical occupancy by either. It is a lead to confirm, not a conclusion - and it is the reason I would ask before striking Magnum off permanently.

What this sample does not establish, and the next steps

Everything above is published information. None of it demonstrates that a vendor will answer, take the work, or carry the cover you need. A qualification pass would confirm:

1. **Contact response** - call each published number and see who answers. Nothing here is call-tested.
2. **Exact property coverage** - the property types and locations they actually service today.
3. **Current operating location** - confirm the working address for each, including ALM's suite-versus-building difference against the registry.
4. **Capacity** - crews, equipment and what happens when several sites need clearing in one storm.
5. **References** - SaBell's and Martinson publish named clients; ask them to be contactable.
6. **Insurance and bonding** - certificates, not marketing claims.

I have kept a small amount of additional research in reserve, including one further company that met the structural tests but that I did not want to put forward without discussing a reservation first.
