

U.S. export controls on advanced AI chips to China, 2022–2026

Chronology, actor positions, trigger indicators, scenarios — a public-source method sample

Koray Nar · Public-source research analyst · Istanbul (remote) · koraynar@gmail.com · Information cutoff 2026-08-18 ·

confirmed primary source directly supports the claim **reported** reputable secondary source

inferred analyst judgment

How this was produced

Sources were collected first by parallel research passes (one per section), then every claim was checked against its cited document by a separate verification pass that could downgrade or drop it. Items that failed verification were removed. Scenarios and “what a change would signal” lines are analyst judgment and are labeled **inferred**. Several AI models worked the task in fixed roles; the author supervised, resolved disagreements, and signed off. Source tally: confirmed: 89, reported: 46, inferred: 3.

Bottom line

Since October 2022 the United States has built a layered control regime on advanced AI chips and the tools that make them, starting with the BIS interim final rule that added ECCN 3A090/4A090 chips and semiconductor equipment to the Commerce Control List and expanded the foreign-direct-product rule S1 **confirmed**, and tightening it in October 2023, December 2024 and January 2025 S6 S9 S12 **confirmed**. Since 2025 the executive branch has partly reversed course: it rescinded enforcement of the AI Diffusion Rule S15 **confirmed**, licensed H20 sales S16 S18 **confirmed**, and in January 2026 moved H200/MI325X-class chips to case-by-case review S25 **confirmed**, one day before a Section 232 proclamation put a 25% tariff on a narrow class of advanced chips not intended for U.S. use S26 **confirmed** — the mechanism reported to carry the government's revenue take S303 **reported**. Actual flows remain small: Nvidia reported no H200 revenue as of its April 2026 quarter S27 **confirmed**, and BIS's Under Secretary called shipments “trivial” in July 2026 S31 **reported**. China has answered with mineral export controls S5 S10 S23 **confirmed**, counter-listings of U.S. entities S30 **confirmed**, an antitrust case against Nvidia S11 **confirmed**, and reported guidance steering firms away from Nvidia parts S19 **reported**, while a Busan truce suspended the sharpest measures on both sides S24 **confirmed** — with the two Chinese suspensions running to 2026-11-10 and 2026-11-27 respectively

[S210](#) [reported](#), and MOFCOM's earlier rare-earth controls still in force. Inferred: the next twelve months turn on the September Xi visit, the November truce cliffs, and whether Congress codifies limits in the FY2027 NDAA.

Chronology

- 2022-10-07 — BIS interim final rule adds advanced chips (3A090/4A090) and SME to the CCL, with new license requirements for China supercomputer and advanced-fab end uses [S1](#) [confirmed](#)
- 2022-12-15 — BIS adds 36 entities, including YMTC, to the Entity List, effective 2022-12-16 [S32](#) [confirmed](#)
- 2023-03-31 — Japan METI announces plans to add 23 types of semiconductor manufacturing equipment to its export-license list [S2](#) [confirmed](#)
- 2023-05-21 — CAC says Micron failed cybersecurity review; critical infrastructure operators told to stop buying [S3](#) [confirmed](#)
- 2023-06-30 — Dutch regulation (effective 2023-09-01) requires licenses for advanced DUV tools including ASML NXT:2000i and later [S4](#) [confirmed](#)
- 2023-07-03 — MOFCOM/GAC impose gallium and germanium export licensing from 2023-08-01 [S5](#) [confirmed](#)
- 2023-08-09 — Executive Order 14105 directs Treasury to build an outbound-investment program covering semiconductors, quantum and AI in China [S34](#) [confirmed](#)
- 2023-09-05 — TechInsights teardown finds the Huawei Mate 60 Pro's Kirin 9000s made on SMIC's 7nm-class N+2 process without EUV [S36](#) [reported](#)
- 2023-10-17 — BIS adds a performance-density threshold and extends chip and SME license requirements to 21 more arms-embargoed countries and to firms headquartered in them [S6](#) [confirmed](#)
- 2023-10-20 — China imposes graphite export controls effective 2023-12-01 [S7](#) [confirmed](#)
- 2024-05-07 — Commerce revokes certain export licenses to a China customer (Intel 8-K) [S37](#) [confirmed](#); reported to be Huawei, with Qualcomm licenses also revoked [S38](#) [reported](#)
- 2024-08-15 — MOFCOM/GAC control antimony and superhard materials from 2024-09-15 [S8](#) [confirmed](#)
- 2024-09-06 — BIS interim final rule adds controls on quantum, GAAFET and advanced-node items [S39](#) [confirmed](#); the Netherlands expands its SME licensing to more DUV models [S40](#) [confirmed](#)
- 2024-10-28 — Treasury issues the final outbound-investment rule implementing EO 14105, effective 2025-01-02 [S35](#) [confirmed](#)
- 2024-11-11 — Commerce sends TSMC an 'is informed' letter restricting 7nm-and-below AI chips for China after a TSMC-made die was found in Huawei's Ascend 910B [S43](#) [S45](#) [reported](#)

- 2024-12-02 — BIS controls 24 SME types, HBM, new FDPR provisions, 140 Entity List additions [S9](#)
[confirmed](#)
- 2024-12-03 — MOFCOM Announcement 46 bans in principle gallium, germanium, antimony, superhard exports to the U.S. [S10](#) [confirmed](#)
- 2024-12-09 — SAMR opens antimonopoly investigation into Nvidia [S11](#) [confirmed](#)
- 2025-01-13 — BIS AI Diffusion Rule: worldwide tiered chip licensing and first control on model weights [S12](#) [confirmed](#)
- 2025-01-15 — BIS issues the foundry due-diligence rule and adds Sophgo, Zhipu AI and others to the Entity List [S46](#) [S48](#) [S49](#) [confirmed](#); the Netherlands adds measuring and inspection equipment to its controls from 2025-04-01 [S42](#) [confirmed](#)
- 2025-01-20 — DeepSeek releases R1 [S50](#) [confirmed](#); U.S. officials reported to probe whether it obtained restricted chips [S51](#) [reported](#)
- 2025-02-27 — Singapore charges three men with fraud over servers routed to Malaysia [S52](#)
[confirmed](#)
- 2025-03-25 — BIS adds 80 entities to the Entity List, including Inspur units [S55](#) [confirmed](#)
- 2025-04-04 — MOFCOM/GAC control seven medium and heavy rare earths [S13](#) [confirmed](#)
- 2025-04-09 — U.S. informs Nvidia a license is required to export H20-class chips to China and D:5 countries, indefinitely; AMD's MI308 is likewise covered [S14](#) [confirmed](#)
- 2025-05-13 — BIS rescinds AI Diffusion Rule enforcement; warns use of Huawei Ascend chips risks violating controls [S15](#) [confirmed](#)
- 2025-07-14 — Nvidia says it will refile for H20 licenses with U.S. assurances [S16](#) [confirmed](#)
- 2025-07-31 — CAC summons Nvidia over alleged H20 "backdoor" risks [S17](#) [confirmed](#)
- 2025-08-05 — DOJ arrests two in the ALX Solutions chip-smuggling case [S53](#) [confirmed](#)
- 2025-08-12 — Bloomberg reports Beijing guidance to avoid H20 chips [S19](#) [reported](#)
- 2025-08-27 — Nvidia 10-Q: officials expect 15% of H20 China revenue; no codifying regulation; licenses granted August 2025 [S18](#) [confirmed](#)
- 2025-08-29 — BIS revokes VEU status for Samsung, SK hynix, Intel Dalian China fabs [S20](#)
[confirmed](#)
- 2025-09-12 — BIS adds GMC Semitech, Jicun and others to the Entity List [S57](#) [confirmed](#)
- 2025-09-15 — SAMR says preliminary finding that Nvidia violated Anti-Monopoly Law; further probe [S21](#) [confirmed](#)
- 2025-09-29 — BIS Affiliates Rule extends Entity List restrictions to 50%-owned entities [S22](#)
[confirmed](#)
- 2025-10-09 — MOFCOM Announcements 61/62 impose extraterritorial rare-earth controls with chip-related case-by-case review [S23](#) [confirmed](#)

- 2025-11-01 — Busan deal: U.S. suspends Affiliates Rule one year; China suspends October 9 controls, issues general licenses [S24](#) [confirmed](#)
- 2025-12-08 — DOJ announces 'Operation Gatekeeper', a ~\$160m H100/H200 smuggling case [S54](#) [confirmed](#)
- 2026-01-13 — BIS final rule moves H200/MI325X-class exports to China to case-by-case review with conditions [S25](#) [confirmed](#)
- 2026-01-14 — Section 232 proclamation: 25% tariff on narrow class of advanced chips from 2026-01-15 [S26](#) [confirmed](#)
- 2026-01-21 — HFAC advances the AI OVERWATCH Act (H.R. 6875) by 42-2 [S58](#) [confirmed](#)
- 2026-02 — U.S. grants Nvidia licenses for small H200 amounts; no revenue to date [S27](#) [confirmed](#)
- 2026-02-12 — Applied Materials agrees to pay about \$252m to settle BIS export-control charges [S59](#) [confirmed](#)
- 2026-04-09 — BIS extends the foundry due-diligence 'authorized designer' deadline to 2026-12-31 [S61](#) [confirmed](#)
- 2026-05-17 — White House summit fact sheet contains no semiconductor or export-control provisions [S28](#) [confirmed](#)
- 2026-05-29 — Japan's METI reportedly adds advanced-packaging equipment to its export-control list [S62](#) [reported](#)
- 2026-05-31 — BIS guidance: license still required for D:5/Macau-headquartered entities anywhere [S29](#) [confirmed](#)
- 2026-06-22 — MOFCOM adds 10 U.S. military-related entities to Export Control Restricted Namelist [S30](#) [confirmed](#)
- 2026-07-14 — At an HFAC hearing, BIS Under Secretary Kessler says H200 shipments to China have begun but are "very few" and "trivial" [S31](#) [reported](#); the same hearing surfaced the eight-month pause in Entity List additions [S306](#) [reported](#)

Actor positions

U.S. Commerce / BIS. BIS now reviews H200/MI325X-class licenses to China case-by-case, conditioned on supply, purchaser compliance procedures and U.S. third-party testing [S101](#) [confirmed](#). Its May 2026 guidance keeps a license requirement on Chinese-parented entities offshore [S29](#) [confirmed](#), and Lutnick told appropriators BIS is "the frontline" against China obtaining top chips while seeking funds for 290 enforcement agents [S103](#) [reported](#).

White House. Trump announced the H200 opening himself, with 25% paid to the U.S. [S105](#) [reported](#). After the May summit he said China "choose not to buy because they want to develop their own" [S106](#)

[reported](#). Adviser David Sacks opposed the AI OVERWATCH Act as restricting presidential discretion [S107](#) [reported](#).

Congress. HFAC advanced the AI OVERWATCH Act 42-2 to subject top-chip exports to congressional review [S108](#) [confirmed](#). Moolenaar has pressed on H200 volumes, ASML DUV tools and the foundry due-diligence rule [S109](#) [S110](#) [S111](#) [confirmed](#). Democrats Meeks and Amo called the 25% revenue take "likely illegal" under ECRA [S112](#) [confirmed](#), and Warren and six other Democratic senators wrote against H200 sales [S113](#) [confirmed](#). Sen. Banks introduced the Senate AI OVERWATCH Act, reportedly folded with the Chip Security and MATCH Acts into the NDAA manager's amendment [S114](#) [reported](#).

Nvidia / AMD. Nvidia's China share fell from about 19% to about 9% of revenue in FY2026 [S115](#) [confirmed](#), it took a \$4.5bn H20 charge and booked only about \$60m of H20 revenue [S116](#) [confirmed](#), and it excludes China data-center revenue from guidance [S118](#) [confirmed](#). Huang argues for selling so the world runs on the U.S. stack [S119](#) [reported](#). AMD holds MI325 licenses but does not know whether China will allow imports [S120](#) [confirmed](#); it booked some MI308 China sales in Q4 2025 and guided about \$100m for Q1 2026 [S121](#) [reported](#).

Allied tool makers and governments. ASML still guides China at about 20% of sales [S123](#) [confirmed](#); its CEO warned tighter curbs speed China's own tools [S124](#) [reported](#). The Dutch trade minister called forced alignment "undesirable" [S125](#) [reported](#). TSMC made no China or export-control statements on its Q2 call [S122](#) [reported](#).

PRC government. MOFCOM says the U.S. "has repeatedly abused export controls" [S126](#) [confirmed](#) and has counter-listed U.S. entities [S127](#) [reported](#). The MFA has answered H200 questions with generic lines — "mutual benefit through cooperation" and "China has made clear its position more than once" — without detail [S128](#) [S129](#) [confirmed](#). Reports say customs were told to block H200 imports and Beijing later approved limited purchases [S130](#) [reported](#).

Chinese industry. Huawei's chairman said U.S. controls forced its chip push [S131](#) [reported](#); SMIC reports overseas orders shifting to China and its first \$3bn quarter [S132](#) [reported](#); Cambricon revenue rose about 160% year on year [S133](#) [reported](#).

Other U.S. voices. Amodei called H200 sales "a big mistake" [S134](#) [reported](#); SIA opposes mandated on-chip security mechanisms in the Chip Security Act [S135](#) [confirmed](#).

Trigger indicators

1. BIS advanced-computing rulemaking — federalregister.gov BIS feed and reginfo.gov — inferred: a Blackwell-class case-by-case rule signals loosening; re-tightened thresholds or codified 25%/50% terms signal tightening — no BIS change to the China license-review policy for advanced-computing items after the 2026-01-15 rule as of 2026-08-18 [S201](#) [confirmed](#); the 2026-04-09 rule

- only extended the foundry due-diligence deadline [S224](#) [confirmed](#); formal AI Diffusion rescission and Affiliates Rule return listed as pending H2-2026 [S202](#) [reported](#).
2. Affiliates Rule suspension cliff — Federal Register RIN 0694-AK34, bis.gov — inferred: extension means the truce holds; lapse on 2026-11-10 means escalation and likely MOFCOM snap-back — suspension in force since 2025-11-10 [S203](#) [confirmed](#); no extension published as of the mid-August 2026 reviews [S202](#) [reported](#).
 3. H200 shipment volumes and offshore enforcement — HFAC/Senate hearings, bis.gov — inferred: rising counts or a Blackwell SKU means executive loosening; a first penalty on an offshore Chinese-parented buyer means hardening — shipments "trivial" as of 2026-07-14 [S204](#) [reported](#); headquarters-based license requirement restated 2026-05-31 [S205](#) [confirmed](#).
 4. Nvidia/AMD China disclosures — investor.nvidia.com, ir.amd.com, EDGAR — inferred: first booked H200 revenue means both governments' approvals operate; continued exclusion means stall — no Hopper China shipments and no China compute in guidance [S206](#) [S207](#) [confirmed](#); AMD Q2 2026 results silent on China [S208](#) [confirmed](#). Next check: Nvidia's next quarterly release (late August 2026) [S206](#) [inferred](#).
 5. Beijing's H200 import approvals — MIIT/NDRC releases, MOFCOM remarks, wire reporting — inferred: a published quota or domestic-chip ratio means an institutionalized "buy Chinese" condition; a blanket ban means retaliation — reported cap under 200,000 chips, training only; no official document [S209](#) [reported](#).
 6. MOFCOM rare-earth and gallium suspensions — english.mofcom.gov.cn — inferred: extension before 2026-11-10 means truce holds; silence or licensing slowdowns mean leverage re-applied — Announcement 70 suspended to 2026-11-10 and Announcement 72 to 2026-11-27 [S210](#) [reported](#); summit fact sheet commits China on named minerals but not chips [S211](#) [confirmed](#).
 7. Chinese counter-listings — MOFCOM spokesperson page — inferred: listing U.S. chip or tool firms, not defense firms, means direct retaliation on semiconductor controls — 10 U.S. military-related entities added 2026-06-22 [S212](#) [confirmed](#).
 8. Analog-IC anti-dumping probe — MOFCOM Trade Remedy Bureau — inferred: duties mean escalation; extension means held in reserve — due by 2026-09-13 with possible six-month extension [S213](#) [reported](#).
 9. SAMR Nvidia case — samr.gov.cn, Nvidia filings — inferred: a fine timed to U.S. moves means retaliation channel active — no final decision; still an open risk in Nvidia's 10-Q [S214](#) [reported](#).
 10. SMIC/Huawei capability — SMIC results, Huawei newsroom — inferred: 5nm-class volume or 950DT on schedule weakens the controls' bite — SMIC Q2 revenue \$3.006bn, utilization 93.7% [S215](#) [reported](#); Ascend 950DT due Q4 2026 [S216](#) [reported](#).
 11. Allied tool controls — Dutch notices, ASML results — inferred: Dutch licensing of NXT:1965i widens the allied gap; new Dutch limits or a U.S. FDPR move tightens alignment — Moolenaar letter flags possible Q4 2026 deliveries [S217](#) [reported](#); MOFCOM's February 2026 listing of 20 Japanese

entities shows the counter-listing tool in use, though those listings targeted defense firms, not toolmakers [S218](#) [confirmed](#).

- | 2. FY2027 NDAA — congress.gov S.4784/H.R. 8800 — inferred: enactment with chip titles constrains executive licensing; stripping in conference preserves discretion — House passed 216-212; Senate floor stalled [S219](#) [reported](#); manager's amendment includes AI OVERWATCH, Chip Security, MATCH [S220](#) [reported](#); MATCH Act introduced 2026-04-13 [S221](#) [confirmed](#).
- | 3. Summit calendar — whitehouse.gov, PRC readouts — inferred: a joint statement extending November suspensions means controls formally bargained — Xi visit set for 2026-09-24 [S222](#) [reported](#).
- | 4. WTO DS615 — wto.org — inferred: a panel request means legal escalation — dormant since 2024-12-27 [S223](#) [confirmed](#).
- | 5. Foundry due-diligence deadline — Federal Register RIN 0694-AJ98 — inferred: another extension means softness; enforcement tightens the foundry-diversion channel — deadline moved to 2026-12-31 [S224](#) [confirmed](#).

Scenarios (next 12 months)

This whole section is inferred analyst judgment, conditional on the data above.

A. Managed licensing continues. Would have to be true: the September Xi visit or later contacts extend the Busan arrangement before the November cliffs; the administration prefers trade diplomacy to new Entity List or SME actions; Beijing drips H200 approvals while favoring domestic chips; Congress does not enact binding review [S315](#) [inferred](#). Confirmations: BIS extends the Affiliates suspension and MOFCOM extends Announcement 70; Nvidia shows small non-zero China revenue or continued exclusion without a formal ban; no reversion of H200-class chips to presumption of denial; NDAA conference softens AI OVERWATCH [S315](#) [inferred](#). Disconfirmations: a rule re-imposing presumption of denial or revoking licenses; MOFCOM re-activating the October 9 measures; a Blackwell-derived SKU moved to case-by-case [S315](#) [inferred](#). Baseline facts: case-by-case regime and 25% tariff in place [S301](#) [S303](#) [confirmed](#); 50% volume cap and Blackwell exclusion [S302](#) [reported](#); Nvidia assumes no China compute revenue [S307](#) [confirmed](#).

B. Renewed tightening. Would have to be true: NDAA enacted with AI OVERWATCH, Chip Security and MATCH largely intact; or November deadlines pass without extension after a failed Xi visit; or a diversion revelation forces enforcement [S316](#) [inferred](#). Confirmations: NDAA signed with binding review; BIS publishes delayed Entity List additions or lets the Affiliates suspension expire 2026-11-09; new SME rules or allied servicing limits; H200 licenses paused with new Nvidia/AMD charges [S316](#) [inferred](#). Disconfirmations: both suspensions extended around the Xi visit; conference strips export-control titles; no Entity List action past November [S316](#) [inferred](#). Baseline facts: manager's amendment

holds the three bills S313 reported; an eight-month pause in Entity List additions reported S306 reported; offshore-headquarters guidance in force S305 confirmed.

C. Broad de-escalation. Would have to be true: the White House treats chip access as tradeable; Beijing lifts customs friction and buys at scale; China converts one-year suspensions into longer commitments; SAMR closes the Nvidia case S317 inferred. Confirmations: BIS raises thresholds above H200 or approves a named Blackwell derivative; Nvidia reports material China revenue; MOFCOM rescinds rather than suspends the October 9 announcements; multi-year Affiliates and tariff pauses S317 inferred. Disconfirmations: AI OVERWATCH-style review enacted; new Chinese listings aimed at U.S. chip firms; Blackwell still barred and shipments still "very few" after the visit S317 inferred. This is judged less likely than A because chips were kept off the May agenda and Congress is moving to codify limits S312 S317 (confirmed/inferred); China pledged at Busan to terminate its investigations of U.S. semiconductor firms S311 confirmed, but no SAMR closure of the Nvidia case has been reported S214 reported.

What this sample does not do

- It uses no insider or private sources; every claim traces to a public primary or secondary item listed above.
 - It assigns no probabilities to the scenarios; they are conditional judgments, not forecasts.
 - It was not commissioned by any party and reflects no client interest.
 - Data cutoff is 2026-08-18; events after that date are not covered.

Chronology

1. **S1** confirmed 2022-10-07 — BIS issued an interim final rule adding advanced computing chips (ECCN 3A090/4A090) and semiconductor manufacturing equipment to the Commerce Control List and imposing new license requirements for supercomputer and advanced-fab end uses in China.
Implementation of Additional Export Controls: Certain Advanced Computing and Semiconductor Manufacturing Items; Supercomputer and Semiconductor End Use; Entity List Modification · Federal Register (BIS) · 2022-10-13
2. **S2** confirmed 2023-03-31 — Japan's METI announced plans to add 23 types of advanced semiconductor manufacturing equipment to its export-license list.
Press Conference by Minister Nishimura (Excerpt), March 31, 2023 · Japan Ministry of Economy, Trade and Industry · 2023-03-31
3. **S3** confirmed 2023-05-21 — The CAC announced that Micron products sold in China failed its cybersecurity review and directed operators of critical information infrastructure to stop purchasing them.

4. **S4** confirmed 2023-06-30 — The Dutch government published a ministerial regulation, effective 2023-09-01, requiring export licenses for advanced semiconductor manufacturing equipment, including ASML's TWINSCAN NXT:2000i and later immersion DUV systems.
Statement regarding export control regulations Dutch government · ASML · 2023-06-30
5. **S5** confirmed 2023-07-03 — MOFCOM and GAC issued Announcement No. 23 of 2023 imposing export licensing controls on gallium- and germanium-related items effective 2023-08-01.
MOFCOM Regular Press Conference (July 6, 2023) · PRC Ministry of Commerce · 2023-07-06
6. **S6** confirmed 2023-10-17 — BIS released two interim final rules updating the October 2022 controls: a new 'performance density' threshold for chips (3A090) and expansion of chip and SME license requirements to 21 additional arms-embargoed countries and to companies headquartered in D:5 countries and Macau.
Commerce Strengthens Restrictions on Advanced Computing Semiconductors, Semiconductor Manufacturing Equipment, and Supercomputing Items to Countries of Concern · BIS · 2023-10-17
7. **S7** confirmed 2023-10-20 — China imposed export licensing controls on certain graphite items (including high-purity synthetic graphite and natural flake graphite) effective 2023-12-01.
Ministry of Commerce Holds Regular Press Conference (November 30, 2023) · PRC Ministry of Commerce · 2023-11-30
8. **S8** confirmed 2024-08-15 — MOFCOM and GAC announced export controls on antimony and superhard-material items effective 2024-09-15.
Ministry of Commerce Regular Press Conference (August 22, 2024) · PRC Ministry of Commerce · 2024-08-22
9. **S9** confirmed 2024-12-02 — BIS issued rules adding controls on 24 types of semiconductor manufacturing equipment and 3 software tools, a new control on high-bandwidth memory (ECCN 3A090.c), new FDPR provisions, and 140 Entity List additions targeting China's chip supply chain.
Commerce Strengthens Export Controls to Restrict China's Capability to Produce Advanced Semiconductors for Military Applications · BIS · 2024-12-02
10. **S10** confirmed 2024-12-03 — MOFCOM issued Announcement No. 46 of 2024 prohibiting in principle exports of gallium, germanium, antimony and superhard materials to the United States and banning dual-use exports to U.S. military end users, effective immediately.
Ministry of Commerce holds Regular Press Conference (December 5, 2024) · PRC Ministry of Commerce · 2024-12-05
11. **S11** confirmed 2024-12-09 — SAMR announced an antimonopoly investigation into Nvidia for suspected violation of the Anti-Monopoly Law and of conditions attached to its 2020 Mellanox acquisition approval.
· SAMR · 2024-12-09
12. **S12** confirmed 2025-01-13 — BIS issued the 'Framework for Artificial Intelligence Diffusion' interim final rule imposing worldwide, tiered license requirements on advanced computing ICs and a first-ever control on closed AI model weights (ECCN 4E091), with compliance required from 2025-05-15.
Framework for Artificial Intelligence Diffusion · Federal Register (BIS) · 2025-01-15
13. **S13** confirmed 2025-04-04 — MOFCOM/GAC Announcement No. 18 of 2025 imposed export controls on seven medium and heavy rare earth elements (samarium, gadolinium, terbium, dysprosium, lutetium, scandium, yttrium) and related items.
Announcement No.18 of 2025 of MOFCOM and GAC on export control on some medium and heavy rare earth related items · PRC Ministry of Commerce · 2025-04-04

14. **S14** confirmed 2025-04-09 — The U.S. government informed Nvidia that a license is required to export H20 chips (and any chip matching H20 memory/interconnect bandwidth) to China and D:5 countries, and on 2025-04-14 said the requirement would last indefinitely.
NVIDIA Form 8-K, Item 8.01 (event date April 9, 2025) · SEC EDGAR / NVIDIA · 2025-04-15
15. **S15** confirmed 2025-05-13 — BIS announced rescission of the AI Diffusion Rule (instructing staff not to enforce it) and issued guidance that using Huawei Ascend 910B/910C/910D chips anywhere risks violating U.S. export controls. Department of Commerce Announces Rescission of Biden-Era Artificial Intelligence Diffusion Rule, Strengthens Chip-Related Export Controls · BIS · 2025-05-13
16. **S16** confirmed 2025-07-14 — Nvidia announced it was filing applications to sell H20 again and that the U.S. government had assured it licenses would be granted, and unveiled a China-compliant RTX PRO GPU.

8. **S108** confirmed 2026-01-21 — On 2026-01-21 the House Foreign Affairs Committee advanced the AI OVERWATCH Act (H.R. 6875), which would subject exports of the most advanced AI chips to congressional review; Mast said the bill "keeps America's advanced AI chips out of the hands of Chinese commie spies."
Chairman Mast, HFAC, advances AI Overwatch Act · House Foreign Affairs Committee · 2026-01-21
9. **S109** confirmed 2025-12-12 — In a 2025-12-12 letter to Secretary Lutnick, Moolenaar said he had "serious concerns that granting China access to potentially millions of chips that are generations beyond its domestic capabilities" would undermine U.S. AI dominance, and requested a briefing on the H200 decision by 2026-01-15.
Select Committee H200 letter to Lutnick, December 2025 · House Select Committee on the CCP · 2025-12-12
10. **S110** confirmed 2026-08-10 — On 2026-08-10 the Select Committee announced Moolenaar's letter urging BIS Under Secretary Kessler to clarify that the Foundry Due Diligence Rule remains in effect, citing that TSMC exports "enabled Huawei to obtain millions of controlled Ascend logic dies" via front company Sophgo in 2023-2024.
Moolenaar: AI Chipmaker End-User Restrictions Undermined by Loopholes · House Select Committee on the CCP · 2026-08-10
11. **S111** confirmed 2026-04-21 — On 2026-04-21 Moolenaar urged Secretary of State Rubio to press the Netherlands so that ASML's NXT:1965i immersion DUV tool "is treated no more permissively than ASML's more capable NXT:1980i at any Chinese fab," citing reports ASML plans to ship certain advanced lithography systems to China by end-2026.

12. **S112** confirmed 2026-01-12 — In a 2026-01-12 letter to Lutnick, Meeks and Amo expressed "alarm and opposition" to approving H200 sales to China and argued the 25% revenue collection "is likely illegal" because ECRA prohibits the federal government from charging fees in connection with the approval of export licenses (the letter cites ECRA generally; it does not cite 50 U.S.C. §4815(c) by section number).
Congressional letter on Nvidia AI chips · U.S. House of Representatives (Rep. Gabe Amo) · 2026-01-12
13. **S113** confirmed 2025-12-12 — On 2025-12-12 Warren led a letter to Lutnick, joined by six other Democratic senators (Schumer, Wyden, Kim, Bennet, Kaine, Slotkin), opposing H200 sales to China; the letter requested answers by 2025-12-19. The quotes 'risks turbocharging China's bid...' and 'After his backroom meeting with Donald Trump and his company's donation to the Trump ballroom, CEO Jensen Huang got his wish...' come from Warren's separate statement of 2025-12-08 on the administration's H200 decision, not from the 12-12 letter release.

34. **S134** **reported** 2026-01-20 — At Davos on 2026-01-20 Amodei opposed H200 sales to China, saying "I think it's a big mistake to ship these chips" and "We are many years ahead of China in terms of our ability to make chips." Anthropic CEO: Selling H200s to China is like giving nukes to North Korea · The Register · 2026-01-20
35. **S135** **confirmed** 2026-03-02 — On 2026-03-02 SIA CEO John Neuffer said SIA "cannot support blanket mandates for new, untested, and potentially infeasible on-chip mechanisms, such as what is being proposed in the Chip Security Act" (S. 1705/H.R. 3447). SIA Statement on Chip Security Act · Semiconductor Industry Association · 2026-03-02

Trigger indicators

1. **S201** **confirmed** 2026-01-15 — INDICATOR 1 (BIS rulemaking on AI-chip licensing): the last BIS Federal Register rule on advanced-computing exports to China is 'Revision to License Review Policy for Advanced Computing Commodities' (RIN 0694-AK43, Docket No. 260112-0028, 91 FR 1684), published and effective 2026-01-15, moving H200/MI325X-class chips (TPP <21,000, DRAM bandwidth <6,500 GB/s) from presumption of denial to case-by-case review subject to supply, third-party-testing and KYC certifications. Revision to License Review Policy for Advanced Computing Commodities (RIN 0694-AK43) · Federal Register · 2026-01-15
2. **S202** **reported** 2026-08-12 — INDICATOR 1 (continued): a law-firm mid-year review dated 2026-08-12 lists as pending H2-2026 BIS actions the formal rescission of the AI Diffusion Rule, implementation of the AI Action Plan's export-control elements, and reimposition of the Affiliates Rule on 2026-11-10 unless further delayed, and notes no

Entity List additions or removals occurred in H1 2026.

BIS Export Controls 2025 Year-in-Review and 2026 Mid-Year Update · Miller & Chevalier · 2026-08-12

3. **S203** confirmed 2025-11-12 — INDICATOR 2 (Affiliates/50% rule cliff): BIS's final rule 'One Year Suspension of Expansion of End-User Controls for Affiliates of Certain Listed Entities' (RIN 0694-AK34, Docket No. 251106-0169, 90 FR 50857) suspended the 2025-09-30 Affiliates Rule effective 2025-11-10, with the suspension set to end 2026-11-09 'absent a future extension'.
One Year Suspension of Expansion of End-User Controls for Affiliates of Certain Listed Entities · Federal Register · 2025-11-12
4. **S204** reported 2026-07-14 — At the 2026-07-14 House Foreign Affairs Committee hearing ('FY27 BIS Budget: the AI Arms Race and the ICTS Office'), Under Secretary Jeffrey Kessler said 'the bottom line is very few shipments against licenses for H200s and equivalents have taken place. It's a very small quantity of chips'; Commerce had approved around 10 Chinese firms this year (SCMP), with earlier reporting putting each customer's cap at up to 75,000 H200s (TrendForce); Chairman Mast urged BIS to keep Blackwell chips out of China and to add Chinese firms to the Entity List, which lawmakers said has not happened since October 2025. The '~\$10 billion' license value figure could not be verified.
Daily: H200s finally make it to China · Chip Briefing (Substack) citing Reuters/CNBC · 2026-07-15
5. **S205** confirmed 2026-05-31 — INDICATOR 3 (continued, enforcement scope): BIS guidance dated 2026-05-31 states a license 'is required to export advanced computing items to entities headquartered in Country Group D:5 or Macau or with an ultimate parent company headquartered in Country Group D:5 or Macau – even if the entities themselves are located outside' those jurisdictions, and that this pre-dates the AI Diffusion Rule non-enforcement policy.
Guidance Regarding Enforcement of License Requirements for Advanced Computing Items for Entities Headquartered in Country Group D:5 and Macau · Bureau of Industry and Security · 2026-05-31
6. **S206** confirmed 2026-05-20 — INDICATOR 4 (Nvidia China revenue/guidance): Nvidia's Q1 FY2027 CFO commentary (quarter ended 2026-04-26, released 2026-05-20) states 'No shipments of Data Center Hopper products to China occurred during the quarter' and that Q2 FY27 revenue guidance of \$91.0 billion ±2% assumes no Data Center compute revenue from China.
CFO Commentary on First Quarter Fiscal 2027 Results · SEC EDGAR (Nvidia 8-K exhibit) · 2026-05-20
7. **S207** confirmed 2026-05-20 — INDICATOR 4 (continued): Nvidia's 10-Q for the quarter ended 2026-04-26 states 'Beginning in February 2026, the USG granted licenses that would allow us to ship small amounts of H200 products to specific China-based customers. To date, we have not generated any revenue under the H200 licensing program, and do not yet know whether any imports will be allowed into China,' and that licenses require a U.S. inspection before shipment.

19. **S219** reported 2026-07-22 — INDICATOR 12 (Legislation – FY2027 NDAA vehicle): the House passed H.R. 8800 (FY2027 NDAA) 216–212 on 2026-07-22; the Senate Armed Services Committee voted 18–9 on 2026-06-10 and reported S. 4784 on 2026-06-15 (S. Rept. 119-127); a motion to proceed was made in the Senate on 2026-07-27, with floor action stalled as of late July 2026 by Democratic objections over the Iran war and spending.
House passes 2027 NDAA while measure remains stalled in the Senate · Breaking Defense · 2026-07
20. **S220** reported 2026-07-15 — As of 2026-07-14/15 the Senate NDAA manager's amendment was reported to include the AI OVERWATCH Act (H.R. 6875, ordered reported by HFAC 42–2 on 2026-01-21), the Chip Security Act (H.R. 3447/S. 1705, HFAC 42–0 on 2026-03-26; location-verification for exported AI chips) and the MATCH Act (S. 4281 introduced 2026-04-13 / H.R. 8170 introduced 2026-04-02 and ordered reported by HFAC 2026-04-22; DUV 'chokepoint' tool alignment with a 150-day allied deadline). Per Sen. Banks' office (WBIW, 2026-07-15) the Senate AI OVERWATCH text extends the prohibition on cutting-edge AI chip exports to countries of concern for 18 months and requires Commerce certification and individual licences; Punchbowl News (2026-07-16) reported HFAC ranking member Meeks is 'not okay' with the Senate AI OVERWATCH text.
Sen. Banks secures AI OVERWATCH Act in Senate NDAA · WBIW (Banks press release) · 2026-07-15
21. **S221** confirmed 2026-04-08 — The MATCH Act was announced by Sens. Risch, Ricketts and Kim (with Schumer as cosponsor) in an SFRC press release dated 2026-04-08; Congress.gov records S. 4281 as introduced 2026-04-13. It requires allied alignment on 'chokepoint' semiconductor-equipment controls with a 150-day deadline before unilateral controls, and the House companion is H.R. 8170 led by Rep. Baumgartner (introduced 2026-04-02, ordered reported by HFAC 2026-04-22).
Risch, Ricketts, Kim Introduce MATCH Act; Level the Global Playing Field for U.S. Tech · U.S. Senate Committee on Foreign Relations · 2026-04-08
22. **S222** reported 2026-07-23 — President Trump said on 2026-07-23 that 'President Xi is coming over on September 24th' for a Washington visit with AI expected to top the agenda, following his 2026-05-14/15 Beijing visit and the 2026-07-22 Rubio–Wang Yi meeting in Manila.
Trump confirms Xi visit to Washington as AI tops agenda · Brussels Signal · 2026-07
23. **S223** confirmed 2024-12-27 — INDICATOR 14 (WTO litigation): China's WTO case DS615 (United States — Measures on Certain Semiconductor and Other Products, and Related Services and Technologies), filed 2022-12-12, remains in consultations; the latest recorded action is the U.S. acceptance on 2024-12-27 of China's 2024-12-19 supplementary consultation request while asserting the measures are national-security matters not reviewable by the WTO.
DS615: United States — Measures on Certain Semiconductor and Other Products, and Related Services and Technologies · World Trade Organization · 2024-12-27
24. **S224** confirmed 2026-04-09 — INDICATOR 15 (Foundry due-diligence rule deadline): BIS's rule of 2026-04-09 (RIN 0694-AJ98, Docket No. 260406-0093, 91 FR 17851, effective 2026-04-07) extended by about eight months, to 2026-12-31, the triggering date for 'authorized IC designer' status and the deadline to apply to become an 'approved IC designer' under the January 2025 foundry/OSAT due-diligence controls.
Extension of Authorized Integrated Circuit (IC) Designer Status and Application Deadline To Become an Approved IC Designer · Federal Register · 2026-04-09

Baseline and scenarios

1. **S301** confirmed 2026-01-13 — On 2026-01-13 BIS announced (rule effective on Federal Register publication, 2026-01-15) that it will review export license applications for the Nvidia H200, AMD MI325X and similar chips to China case-by-case, provided (1) exports do not reduce global semiconductor capacity available to US customers, (2) the Chinese purchaser has export-compliance procedures incl. customer screening, and (3) the product has undergone independent third-party testing in the US.
Department of Commerce Revises License Review Policy for Semiconductors Exported to China · U.S. Bureau of Industry and Security · 2026-01-13
2. **S302** reported 2026-01-15 — The January 2026 case-by-case policy covers chips with total processing performance under 21,000 and total DRAM bandwidth under 6,500 GB/s (roughly H200/MI325X level), and requires that aggregate shipments to China/Macau not exceed 50% of the quantity shipped to US customers; chips above these thresholds (e.g., Nvidia Blackwell) remain outside the relaxation.
BIS Revises Export Review Policy for Advanced AI Chips Destined for China and Macau · Morgan Lewis · 2026-01
3. **S303** confirmed 2026-01-14 — On 2026-01-14 President Trump signed a Section 232 proclamation imposing a 25% ad valorem tariff, effective 12:01 a.m. EST 2026-01-15, on certain advanced computing chips not intended for US use, with exemptions for US data centers, repairs, R&D, startups, non-data-center consumer/civil industrial and public-sector uses; the White House fact sheet names the Nvidia H200 and AMD MI325X. The proclamation itself does not mention China; the '25% cut' on China-bound H200s is the widely reported effect.
Adjusting Imports of Semiconductors, Semiconductor Manufacturing Equipment, and Their Derivative Products into the United States · The White House · 2026-01-14
4. **S304** reported 2025-12-08 — On 2025-12-08 President Trump announced the US would allow Nvidia to ship H200 products to 'approved customers' in China with 25% of the revenue going to the US government, explicitly excluding Blackwell and Rubin chips.
Trump greenlights Nvidia H200 AI chip sales to China if U.S. gets 25% cut, says Xi responded positively · CNBC · 2025-12-08
5. **S305** confirmed 2026-05-31 — On 2026-05-31 BIS issued guidance clarifying that a license requirement (first introduced Nov 17, 2023) continues to apply under § 742.6(a)(6)(iii)(A) for advanced computing items (e.g., ECCN 3A090.a/.b, 4A090.a/.b and related .z items) to entities headquartered in, or whose ultimate parent is headquartered in, Country Group D:5 or Macau, even if located outside D:5/Macau; bona fide data-center operators need not cease ongoing use, storage, disposal or servicing of such items 'until further notice from BIS'.
Guidance Regarding Enforcement of License Requirements for Advanced Computing Items for Entities Headquartered in Country Group D:5 and Macau · U.S. Bureau of Industry and Security · 2026-05-31
6. **S306** reported 2026-07-14 — At the 2026-07-14 House Foreign Affairs Committee hearing on the FY27 BIS budget, Under Secretary Jeffrey Kessler said roughly \$10 billion of H200 licenses had been approved but 'very few shipments against licenses for H200s and equivalents have taken place' ('trivial'); press reporting (not Kessler) puts approved buyers at roughly ten Chinese firms; the article also notes an Entity List freeze with no new designations.
China Export Controls Face House Scrutiny · Legis1 (with SCMP corroboration) · 2026-07-14
7. **S307** confirmed 2026-05-20 — Nvidia's Q1 FY2027 results (2026-05-20) state the company 'is not assuming any Data Center compute revenue from China in its outlook' for Q2 FY27.
NVIDIA Announces Financial Results for First Quarter Fiscal 2027 · NVIDIA Newsroom · 2026-05-20
8. **S308** reported 2026-01-14 — On 2026-01-14 Reuters (three sources) reported Chinese customs agents had been told not to allow Nvidia H200 imports; a separate report by The Information said Beijing would approve H200 purchases only in 'special circumstances' (e.g., university R&D partnerships). In July 2026, Reuters/The Information reported Beijing was preparing to authorize fewer than 200,000 H200s in total, restricted to training, with domestic chips prioritized for inference.

Chinese customs told to block H200 imports, report claims · Yahoo Finance (Reuters via Tom's Hardware); TrendForce · 2026-01-14

9. **S309** confirmed 2025-11-12 — BIS's Affiliates Rule (Sept 30, 2025; extending Entity List restrictions to entities 50%-or-more owned by listed parties) is suspended from 2025-11-10 through 2026-11-09 by a final rule published 2025-11-12 (effective 2025-11-10). The Federal Register rule does not itself reference the US-China arrangement; that link is stated in the White House 2025-11-01 fact sheet.
One Year Suspension of Expansion of End-User Controls for Affiliates of Certain Listed Entities · Federal Register · 2025-11-12
10. **S310** reported 2025-11-07 — MOFCOM/GAC Announcement No. 70 of 2025 (2025-11-07) suspends the six 2025-10-09 announcements (Nos. 55, 56, 57, 58, 61, 62 — rare earths, rare-earth equipment/technology, foreign-origin rare-earth items with Chinese content, lithium batteries and superhard materials) until 2026-11-10; a separate MOFCOM Announcement No. 72 (2025-11-09) suspends Article 2 of Announcement No. 46 of 2024 (gallium/germanium/antimony/superhard-material export ban to the US) until 2026-11-27.
China Temporarily Suspends Export Controls on Key Raw Materials, Including Rare Earths, Lithium Batteries, and Diamonds · CIRS Group (summarizing MOFCOM Announcement No. 70 of 2025) · 2025-11-07
11. **S311** confirmed 2025-11-01 — Under the 2025-11-01 White House fact sheet on the Busan deal, China committed to 'terminate its various investigations targeting U.S. companies in the semiconductor supply chain, including its antitrust, anti-monopoly, and anti-dumping investigations' and to issue general licenses for rare earths, gallium, germanium, antimony and graphite for US end users.
Fact Sheet: President Donald J. Trump Strikes Deal on Economic and Trade Relations with China · The White House · 2025-11-01
12. **S312** confirmed 2026-05-17 — The 2026-05-14 Trump–Xi Beijing meeting produced no change to chip export controls (USTR Greer told Bloomberg TV 'We did not talk about chip export controls at the meeting'); the 2026-05-17 White House fact sheet does not mention semiconductors, says China 'will address U.S. concerns regarding supply chain shortages related to rare earths and other critical minerals, including yttrium, scandium, neodymium, and indium', creates a US-China Board of Trade and Board of Investment, and says Xi will visit Washington in fall 2026.
Fact Sheet: President Donald J. Trump Secures Historic Deals with China, Delivering for American Workers, Farmers, and Industry · The White House · 2026-05-17
13. **S313** reported 2026-07-14 — As of 2026-07-14 the Senate FY2027 NDAA manager's amendment included the AI OVERWATCH Act, the Chip Security Act (location verification on exported AI chips) and the MATCH Act (chokepoint SME controls), per ARI; the House version H.R. 6875 was ordered reported by HFAC 42–2 on 2026-01-21 and S.4456 was introduced 2026-04-30.
Senate NDAA Takes Major Step to Strengthen AI Chip Export Controls · Americans for Responsible Innovation · 2026-07-14
14. **S314** reported 2026-07-15 — On the tools side, EUV lithography remains blocked to China and China's share of ASML system sales fell to about 14% in Q2 2026 (from about 36% in Q4 2025), while a bipartisan MATCH Act (introduced 2026-04-02) would tighten SME sales/servicing to China with a 150-day window for allies to align.
ASML shares fall after hiking sales forecast for second time this year on strong AI chip demand · CNBC · 2026-07-15
15. **S315** inferred SCENARIO: Managed licensing continues (status-quo muddle-through) — the H200-class case-by-case regime with the 25% Section 232 tariff persists, Blackwell/Rubin stay blocked, and both sides roll over the November 2026 truce deadlines.
analyst judgment — no external source
16. **S316** inferred SCENARIO: Renewed tightening — the truce lapses or Congress codifies restrictions, producing new US controls (Entity List additions, Affiliates Rule snap-back, SME/MATCH-style rules) and Chinese counter-measures.
analyst judgment — no external source

17. **S317** inferred SCENARIO: Broad de-escalation/deal — a summit package (Xi visit, APEC, G20) trades wider chip access (formal H200 framework, possibly a Blackwell-derived China SKU) for durable Chinese rare-earth/critical-mineral commitments and closure of probes into US chip firms.
analyst judgment — no external source
